SCRIPTURE EVIDENCE.

BARON LIEBIG in his work on Animal Chemistry, says: "No Analytical Experiment can be made to show the difference between healthy blood and that of a person laboring under Consumption."

DR. J. S. HOUGHTON'S PEPSIN

Is the Pure Digestive Fluid or Gastric Juice!

Prepared from RENNET, or the fourth stomach of the Ox, by Dr. J. S. HOUGHTON, M. D., in the Academy of Medicine, Philadelphia, and Member of the Royal College of Surgeons, London.

PEPSIN is the chief element, or Great Digestive Principle of the Gastric Juice, according to ARTIFICIAL DIGESTION, and possesses the natural power to digest and prepare the food for the nourishment of the various tissues of the body. It is concentrated from the mucous membrane of the stomach of the Ox, containing no acid, and being free from the animal matter, which is usually combined with it in the Gastric Juice. It will be found a most valuable remedy for Dyspepsia, Indigestion, Nervousness, Sick Headache, Heartburn, Flatulency, Sour Stomach, Nausea, Vomiting, Loss of Appetite, Costiveness, Pain in the Stomach, Bowels, and Side, Languor, Lowness of Spirits, Hypochondria, Hysterics, Palpitation of the Heart, Headache, Giddiness, Drowsiness, Dimness of Vision, Numbness of the Limbs, Nervousness, Trembling, Paleness of the Face, Eruptions on the Skin, Humors, Impurities of the Blood, Decay, Emaciation, Consumption, Fevers, Ague and Fever, Intermittent Fever, Typhus Fever, Typhoid Fever, Yellow Fever, Scarlet Fever, Measles, Small Pox, Erysipelas, Jaundice, Liver Complaint, Constipation, Debility, curing all of Nature's own diseases.

☞ We do not feel obliged as yet to pronounce the telegraphic report of the death of Wm. R. King a hoax. It would be a difficult matter to forward such a report if false, yet it could be done. The report has not been confirmed, neither is it been denied. We expect to know the truth of the matter to-day by the N. York papers. We subjoin a dispatch from Madison, Wisconsin, by which it will be seen that the election of that State have concluded, as we have, to await further advices:

MADISON, Dec. 1st, 9 P. M.

The electors met at the Capitol to-day, at 12 M., and voted for Pierce for President, and adjourned to 7 P. M.; met, pursuant to adjournment, and having no further tidings in regard to the Report of Wm. R. King's death, they thought best to hold over till to-morrow, and accordingly adjourned. No messenger to carry result to Washington appointed.

MILLARD FILLMORE.

ST. ANDREW'S SOCIETY.—The following excellent remarks by the President of the Society George Anderson, Esq., which we were unable to give in the report of the Anniversary yesterday, we now lay before our readers:

Brethren of the St. Andrew's Society:

Allow me to congratulate you on the return of another Anniversary, and to thank you for the honor of electing me your President for the present year, an honor which I value and esteem. I know that you might have elected from among you, some one else, who would have presided more ably and eloquently, but I will yield to no one in the esteem and respect I entertain for the prosperity of this Society, and for carrying out its great fundamental principles, of charity and benevolence.

Gentlemen: This is now the seventh anniversary of your Society, and I am happy to state that at no other period since its formation, has it been in such a state of prosperity; and such a kindly and laudable spirit been manifested amongst its members.

Mr. Ballantyne on introducing the names of Burns, Scott and Campbell, made the following remarks on Burns:

The toast which has been assigned me, is one, in which not only every Scotchman, but every lover of pure literature will join—the memory of Burns, Scott and Campbell, and that illustrious band of *all* minds men, who have created for themselves imperishable monuments of fame, shielded their country, and embellished their language by their works. The word now claims them:—their sweet songs charm the Indian in his wigwam, as well as the monarch in his palace. Wherever the English language is spoken, their works are "familiar as household words;" and as long as lovely song and pure literature are prized, will the sweet melodies of Burns and Tannahill be chanted at the firesides of the enlightened nations of the earth.

Professor Wilson, better known as Kit North, calls Burns the Shakespeare of Scotland; and he even maintains that he excels Shakespeare in many places. This point I will not argue,—Sufficient is it for us to know that, although Burns's writings are principally in the Scottish dialect, still in the pure Anglo Saxon he has had as many admirers on this side the Atlantic as on the other side of the water. His songs are considered British classics, and will remain ornaments of British literature, and adorn the English language through all coming time. They are perfect gems of purity, combining simplicity, refinement in their most genuine forms, blended together by all the beauties of imagination, and the realities of active life. "No poetry," says Wilson, "ever became more extensively popular in any country, than that of Burns in Scotland. It comes at once and the same time The proprietors of these establishments think they give us our money's worth, by furnishing food for the eyes and ears —as to the lungs, that is our own look out.—Bring your own provisions—or, perhaps, as some Englishman says, they are willing to admit nothing that does not pay, but eyes fresh air.—But, the more common reply is the old argumentum *ad locum*, "in old times people never heard of ventilation yet they got on very well." Perhaps so; but the forefathers did not rush in masses to laugh at Nibblo's, or to look wise at the Tabernacle—nor was the general talent work and refined, and the other to fear no conspiracy at the plow—along with his noble spirit, which abhorred all meanness, insincerity, and oppression, and which caused him to weep over the destruction of a mountain daisy, or a mouse's nest; these are all moral contrasts and blendings that belong to the spirit of true poetry. Burns was, in his younger days, as spoken as his own green hills; born in the veriest shades of obscurity, he toiled industriously to support his aged father's household—yet eagerly grasping at every opportunity of enlarging knowledge from men or books. Thoroughly acquainted with the history of his native home—revering every memorial of departed greatness —and striving, with herculean strength, to do something for Old Scotland's sake, Burns stands as an example of patriotism and perseverance to the whole world.

It was not till he had become the fashionable wonder of his day, that some errors cast a shade over the brightness of his genius; a remnant of but the higher lineaments of his character were never destroyed—the column was defaced, not broken; and now that the damning mists of prejudice are dissolving, and the lost proportions and exalted symmetry are beheld, every patriot's and pride by his countrymen and the world.

Who that has read his "Cottars Saturday Night" can forget the Ayrshire Poet? Let his shadowed read that passage in which "the toil was made to mourn," and then question his piety, his affection or his patriotism if they dare listen to the best verses of the "Cottar's Saturday Night":

"From scenes like these old Scotia's grandeur springs,
That makes her loved abroad, revered at home;
Princes and lords are but the breath of Kings,
An honest man's the noblest work of God."

* * * * * * *

Ah, Scotia! my dear, my native soil,
For whom my warmest wish to heaven is sent,
Long may thy hardy sons of rustic toil
Be blessed with health, and peace, and sweet content;
And oh, may Heaven their simple lives prevent
From luxury's contagion, weak and vile,
Then, how e'er crowns or coronets be rent,
A virtuous populace may rise the while
And stand a wall of fire around their much loved isle.

Besides Burns, there is included in the toast before us, the name of Scott—the world's known. "Marmion," "Lady of the Lake," and the "Vision of Don Rhoderick" proclaimed his fame as a Poet; while his Waverly novels stamp him as the Historian of Scotland. Indeed, he, too, like Burns, loved his country with a devotional feeling, and made "rustic life and poverty"—

"Grow beautiful beneath his touch."

Duchesses and ladies of eminence traced with interest and delight his portraiture of humble life. Previous novelists had confined their fictions to chivalric deeds and bloody fields; kings and queens, princes and lords; but Sir Walter Scott carried his readers into the abode of the humble cottager, and taught the noble and the great to appreciate virtue, honesty and industry, however humble and unknown. Perhaps to this may be attributed in no small degree the care which a Scottish lord has ever shown for his poor but honest tenantry; and makes the lauded aristocracy of our native land look with pride and gratitude on the welfare of their peasantry.

Sir Walter Scott has immortalized the scenery of his native land. How many thousands, far from Scotia's hills and valleys, have followed him, in his lays among her mountain brow crag to peak, through highland glen and rocky cave—from the land of the Macgregor, amid the fast recesses of mountain wilds, to the abode of Nicol Jarvie, in Shakespeare Square, Glasgow!

But the great Novelist has left behind him more than his poems and Novels. He has left the world an example of honesty, industry, and perseverance, which many revere of as great value as his writings. Being involved, by his connection with a publishing house, to the enormous extent of £117,000 sterling, when over 50 years of age, he left his beautiful and romantic estate of Abbotsford, to labor in the busy streets of Edinburgh, and there determined to burn his "mid night oil" till his debts were paid. A composition was pressingly offered him; but he proudly refused to accept it. Sir Walter left his toil with his pen, over the signature of the Unknown—in this brief period he gave the world the Waverly Novels, cleared his debts, and left himself to be, not only a Poet and a Novelist, but every inch a MAN.

Among our Scottish poets, are Thomas Campbell, the most purely classic of all the poets.—William Motherwell, the author of "Jeanie Morrison," the most touching piece of composition that Poet ever penned; Tannahill, the Paisley Weaver, who has charmed the world with "Gloomy Winter's now awa," and "Jessie, the Flower of Dumblane."

Mr. Campbell has also introduced the names of Burns, Scott and Campbell, made the following remarks on Burns:

The toast which has been assigned me, is one, in which not only every Scotchman, but every lover of pure literature will join—the memory of Burns, Scott and Campbell, and that illustrious band of *all* minds men, who have created for themselves imperishable monuments of fame, shielded their country, and embellished their language by their works. "No poetry," says Wilson, "ever became more extensively popular in any country, than that of Burns in Scotland. It comes at once and the same time

Mr. Campbell then proposed the following toast:

Proper Ventilation.

The following article from the New York *Post*, is as applicable to this city," perhaps, as New York, and should receive the attention of those building churches and halls, every where:

MORE AIR OR NO SUFFOCATE!—At this season of lectures, theatres, concerts, and balls, we feel called upon to protest against the utter want of ventilation in places of public amusement. All are alike; Tabernacle, Metropolitan Hall, Niblo, Burton's, churches and concert rooms, you cannot enter any of them an hour after the audience has assembled, without being warned that the air is tainted, and that in your pursuit of pleasure, you will probably bring away a headache.

Nor is this nuisance peculiar to public assembly rooms. It preys upon the comfort and health of the guest in the private rooms and bedchambers of our friends. It is the bane which him to the omnibus and the railway car, to the counting room and the court room; wherever, indeed, pure air is most in demand; then, especially, is it most denied. The more refinement in other respects, the more commonly popular in any country, the more the greater number of victims are slain. And the same time

The proprietors of these establishments think they give us our money's worth, by furnishing food for the eyes and ears —as to the lungs, that is our own look out.—Bring your own provisions—or, perhaps, as some Englishman says, they are willing to admit nothing that does not pay, but eyes fresh air.—But, the more common reply is the old *argumentum ad locum*, "in old times people never heard of ventilation yet they got on very well." Mr. Campbell then proposed the following toast:

Progress.

The progress of the nations—may it be as peaceful as it is rapid.

Mr. Campbell said:

Gentlemen: I am not sure that I am not out of order in proposing a toast which is not strictly connected with the memory of Scotland's illustrious dead; but I am sure that I am not out of order in proposing a toast which is connected with the living interests of Scotland's sons. To Capitalists.—We direct attention to our advertising columns for the offer to sell an interest in the well known and very flourishing establishment of Messrs. Gates & McKinney, Engine builders, &c. More capital is needed to keep pace with the greatly increasing demand for machinery of all kinds. We shall to morrow give a more extended notice of this establishment.

Importation of Canaries.—Donnelly & King, 69, 91 and 93 Randolph st., Livery Stable Keepers, have just received a very handsome carriage from James Brewster & Sons, N. Y. It is said to be the most elegant carriage that has yet appeared in Chicago, having cost $900.

The style, make and trimmings are certainly of a very superior kind. At the same time they received twenty-five buggies and carriages of various descriptions, from the same place, all of which are for livery.

Correction.—Those who read the *New York Evangelist* will probably perceive an evident error in one of the credits in the communication respecting the New Congregational Church, in our issue a portion of it to that paper instead of to the *Christian Evangelist*.

Mechanics' Institute.—In the very foremost of rewards, that of a gold medal to George F. Foster & Co., of this city, for best cordage, was omitted by mistake.

Piano Tuning.—We take pleasure in announcing that Mr. Leyboer has dates timed to make his city his home, and will devote his whole attention to instruction in music, and delicately tuning pianos. His qualifications are superior, being himself one of the most accomplished Pianists of the day. He is enabled to take a few more pupils on application being made to him.

Tobacco.—This is a much persecuted article—but people will use it, just because they *chose*. Now, we sometimes *puff* the weed, under the cognomen of cigars—but, happening the other day in possession of a quarter section natural leaf plug, and not wishing to learn even on such an enticing specimen, we handed it to a friend whose long experience and unrepulsing order in expressing moisture from this narcotic, to express his opinion in the premises. "Ah," said he, as the sweet morsel accumulated the saliva under his tongue "you must have got this at Corbin's, on Clark street." That's where we got it, 0 so 10,000 tobacco chewers—and "they say" he keeps "that that's good." We believe our friend is sure of it.

Medical Treat.—We observe that Mr. Nathaniel Joy, a well known and popular lecturer on the laws of animal life, is preparing to treat his friends with one of his festivals in the form of a Juvenile concert of both instrumental and vocal music at Warner's Hall to morrow evening. His notices inform us that, as an episode, he will have his classes sing any new pieces of music proposed by the audience. We have listened to some of the examinations of his classes, and their performances were excellent. If so good in the concert, it cannot fail to secure the approbation of all good judges of harmony.

His public examination comes off to-morrow afternoon.

Mending the Ways.
We have been glad to observe, for the last day or two back, that Mr. Knight, street commissioner for the South Division, has been busy mending, not only his own, but the public ways, and verily in the city there are many ways that much need mending, some of which Mr. Knight would mend if he could; and there are many ways which Mr. Knight could not mend if he would. Some ways, especially the cross-ways, are but indeed, emphatically bad; but then, they belong to the city Fathers. And till they are so disposed, such ways must remain unmended. For our part we care not how soon the city Fathers fall to over a few loads, and we rejoice to see that they are doing so by beginning to mend their ways.

A New Fragrance Case.
During one of the recent heavy gales on our lake, an imminent danger of the foundering of a brig laden with Baltimore flour, drove the crew to the long boat for safety. In their efforts to get into the boat, herded of the men fell into the lake, but finally all but one were safely stowed in the boat. He was a regular "Old Salt," who had been for many years engaged in the "blue water trade," in the Pacific. The boat was crowded beyond her capacity for safety, and the insiders treated all the applicants for its taken on board, alleging that all on it must perish if they took him in. For half an hour he manfully hung on to the gunwale, while they standily fended their oars, pushing the poor, drenched, half dead, and finally half frozen fellow-mariner from their boat. At last, when fathomed of every stitch on that board in disgust!—N. Y. Herald.

Hard and Soft.—We understand that at this time there are among the pilgrims to Cooper and Governor Seymour, of Utica, and Erastus Corning, of Albany—the first a well-salted Democrat, and the latter a hard-shelled, blue-blooded old hunker. Gov. Seymour is the vice-regent of ex-Governor Marcy, and goes, perhaps, to take the measure of a new pair of breeches. Perhaps Corning goes to checkmate him. We know—we—no, cares! What a happy time for, when fathomed of every stitch on that board in disgust!—N. Y. Herald.

COMMERCIAL.

Receipts of Produce from all sources, since our last amount to 1,661 bushels of wheat, 40 do corn, 98 do Rye, and 250 do Oats.

The Produce market continues inactive in consequence of the small amount coming forward. FLOUR is not in much demand, except for local trade, of which 400 bbls for last and fall brands City sold at $4.00@4.25 for shipment. No offering Delaware and extra Michigan brands. WHEAT is a shade lower, there being few buyers in the market beside the mills. CORN is nothing improved, and we make sales of new out at 40c. RYE is dull. Small lots old shelled are taken by the mills at 51c. Oats are in fair request, but this is no criterion in the market. So, also, of small lots of new shelled, taken for distribution at bids of 30c. BARLEY is nominally 70 cents; but small sales are made at the market, to supply a very small local demand, at 70@75c. No coarse grain and timothy seed will be closed out at a figure beyond yesterday's rates. RYE is in moderate demand for distillation, but there is no market beyond this. Receipts very light, and 51 @ 52c is a full valuation. BARLEY has almost ceased coming forward. About 1 @ 2 is the nominal quotation. FLAX SEED is in good request for Chicago Mill at 81 @ 82c. We quote small sales of Produce as follows:

WHEAT—167 bushels new spring at 39 @ 40c; 1 do do at 35c; 20 do do at 39c; 3 do old spring, for distillery, at 46c—and do spring and transmit could be closed out at a figure beyond yesterday's rates. RYE is in moderate demand for distillation, but there is no market beyond this. Receipts very light, and 51 @ 52c is a full valuation. BARLEY has almost ceased coming forward. The difficulty is the business of changing the scale, and the consequent loss of time, and the best solution of the difficulty is in the mechanical arrangement of the scale, so that scales of the largest size will not be required for the heaviest load and as simple as in the toy of C. The subject of transportation is a great one, and will be more deeply considered by new figures and diagrams. The Chromatic scale, even, is so important in the war of the great metropolitanism in the war of its general use in schools.

The publication of poetry, Pen and Ink sketches, and city interesting and varied character. As has been before remarked, the Mirror is a publication for the family circle, for special request, and for a special object, and there is perhaps no other publication in the world which has been so universal in circulation, and has been bestowed on this.

METROPOLITAN GLEE BOOK, OR ALPINE GLEE SINGER, VOL. II.

Will contain an entirely new collection of Social, Glee and Quartette Music, of the most popular, interesting and instructive character.

There will be no repetition in pieces of the first volume, which is now in the 10th edition—two thousand required. To those who have used the first volume of the ALPINE GLEE SINGER, the other and second volume will be welcome, as the present volume need be offered than to say that it is called for the same enterprising and indefatigable author, (W. B. Bradbury,) whose acknowledged talent and resources, will be a sufficient guarantee of its merits, on which they can safely be recommended.

The second volume will be ready by Nov. 30th. Price $1, or $10 per dozen.

Hard Times Soirée.—We understand that at this time there are among the pilgrims to Cooper and Governor Seymour, of Utica, and Erastus Corning, of Albany—the first a well-salted Democrat, and the latter a hard-shelled, blue-blooded old hunker. Gov. Seymour is the vice-regent of ex-Governor Marcy, and goes, perhaps, to take the measure of a new pair of breeches. Perhaps Corning goes to checkmate him. We know—we—no, cares! What a happy time for, when fathomed of every stitch on that board in disgust!—N. Y. Herald.

THE GREAT RESTORATIVE.—FLESH AND BLOOD

Is the genuine Jonathan Heindrix, of West Union, Park County, Indiana, writes that he has suffered great pain from a severe and protracted attack of Fever and Ague, and was entirely restored in health, by the use of the Life of Flesh alone. These Pills compound their present great fame by the prompt and speedy manner in which they relieve the most excruciating pains, and restore to health even the feeble and debilitated. The numerous testimonials from the highest and most respectable sources, are the most unanswerable proof that they are the most valuable remedy ever discovered for the cure of Rheumatism, Neuralgia, Gout, Dyspepsia, Liver Complaint, Fever and Ague, and all diseases arising from a disordered stomach or torpid liver. Sold by all Druggists in Chicago, and by Druggists generally throughout the United States, and countries.

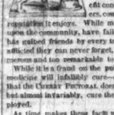
Ayer's Cherry Pectoral.
FOR THE CURE OF
COUGHS, COLDS, HOARSENESS, BRONCHITIS
WHOOPING COUGH, CROUP, ASTHMA AND INCIPIENT CONSUMPTION.



Many years of trial, instead of impairing the confidence the people have in this medicine, have won for it an appreciation and notoriety, by the exceeding value of the cures it has performed, that is without parallel. Other remedies may have equal claims upon the community, have failed and been discarded, this has called friends by every trial, conferred benefits on the afflicted in every section, and produced cures too numerous and too remarkable to be forgotten.

While it is a stand on the public to pretend that any one medicine will cure all diseases, it is but the simplest proof that the Cherry Pectoral does not only as a general thing, but almost infallibly, cure the maladies for which it is recommended.

As time makes these facts wider and better known, its medicine has gradually become the best reliance of the afflicted, from the log cabin of the American peasant, to the palaces of European Kings. Throughout the entire country, wherever man is found, and wherever disease prevails, it is the best remedy that can be obtained. Almost in every town and village there is some person who has been restored to health from some of the above complaints, by this remedy, and their names, with the particulars of their cases, are freely given to the agent, or may be found in our almanac.

The Cherry Pectoral is not adulterated by a Practical Chemist, and every atom of it under his own eye, with integrity and skill, and the result is a remedy that can be relied on as pure from counterfeits, consequently can be relied on as genuine, without adulteration.

We have endeavored here, to furnish the community with a medicine of such intrinsic superiority and worth, as should commend itself to their confidence—a remedy at once safe and reliable, in the hands of which the public may be rescued from the many nostrums which the day has brought forth, and which has proved itself to be; and trust by great care in preparing it with chemical accuracy, of uniform strength to all those who may favor us with their custom, on which they can rely for the best results, and the efficient with a remedy that will do for them all that medicine can do.
